

# > SUSTAINABILITY CREDENTIALS

## LOW CARBON MILES TO MARKET

Manufactured in New Zealand using local materials.

## RE-CONSTITUTING REJECT MATERIAL

Crushing reject product and reusing in clay mixes.

## RECYCLING OTHER COMPANY'S WASTE

Recycled glass from refuse stations is used in our clay mixes. Reclaimed oil from industrial waste is used to fire our kiln.

## RECYCLED PACKAGING

Our pallets are collected and reused over and over again.

## PRODUCT LIFE CYCLE

Brick has some embodied energy to produce, this is off-set by the long life cycle of the product. Clay bricks can last hundreds of years and upon the buildings life cycle finishing, the product can be returned to the earth with no environmental effects.
