

# WAKATIPU

**BRICK SIZE:**

290 x 50 x 70mm nominal

**UNITS PER m<sup>2</sup>:**

58

**PACK SIZE:**

741

**PRICE PER BRICK:**

\$0.88 ex GST

**PRICE PER m<sup>2</sup>:**

\$51.04 ex GST

**TYPICAL PROPERTIES**

Dry Weight (Per Unit) Average:	1.30kg	Compression Strength Average:	37mpa
Finished Wall Dry Weight Average:	120kg	24 Hour Cold Water Absorption Average	12.8%

## IMPORTANT NOTICE

**Choosing Bricks**

Brick will vary from brochures and other samples or houses you may have seen. It is important you view your bricks on site prior or at commencement of laying.

**Consistency**

Bricks are a natural product therefore they will vary in colour and texture from batch to batch.

**Blending**

Bricks must be blended off multiple pallets to avoid an inconsistent finish.

**Please refer to documents TB1, TB2 and TB3 for all laying and cleaning requirements on our website: [www.clay-bricks.co.nz](http://www.clay-bricks.co.nz)**

**Quality**

While every effort will be made to mitigate defects, because of the combination of natural elements, manufacturing and transportation clay bricks will have minor chipping and cracking, these are part of the brick.

**Inspection of Brickwork**

Brick and Bricklaying should be viewed from a distance of 4 metres.
